1. Preface

1.1 Confidentiality Statement

This document is copyright protected and the property of Cover Cloud Limited and intended for internal use only. This document contains commercially sensitive information and must not be made available to any individual or organization outside Cover Cloud Limited and Chillsport Restaurant without written permissions from Cover Cloud Limited; unauthorized disclosure may result in penalties and/or disciplinary action.

1.2 Document Objective

The objective of this document is to provide preliminary proposal for development of Chill Sport (Web Apps + Mobile Apps) which comprises:

- Project Over view/Scope of work
- Features and technical aspects of the project
- Details of Project Deliverable
- Terms and Conditions

2. Project Description

2.1 Project Overview

Proposed project comprises the development of Web Panel and Mobile Application for Android and iOS platform to order online food. User can select current location and can order from the nearest restaurant. Restaurant owner can register restaurant on web panel. The delivery persons receive order for delivery to the customer. Admin will have access to the complete system and would be able to manage the same from backend.

2.2 Project Scope

The Proposed system will be developed with following components:

- Mobile Application
 - Android (For User and Delivery person)
 - iOS (For User and Delivery person)
- Web Panel for User
- Web Panel for Delivery person (Only for registration)
- Web Panel for Restaurant
- Web Panel for Admin
- Web Services
- Database
- 3rd Party (Firebase, SMS, Payment gateway- Flutterwave payment gateway, Email Service, Geo Service, Google location Service, Checker)

2.3 Application S

- Web platform (Admin Panel +User + Restaurant)
- Delivery person registration from User web panel
- Android Application for User and Delivery person
- iPhone Application for User and Delivery person

2.4 User Type

- User
- Restaurant
- Delivery person
- Admin

3. Technical Architecture

Cover Cloud Limited

4. Platform Flow

4.1 User Web Panel

- For User registration and order food online
 - Browse a link
 - Register Screen
 - o Name
 - o Email
 - o Phone Number
 - o OTP
 - o Add referral code if you have
 - o Register via social network
 - Login
 - o User can login by entering following fields:
 - ❖ Phone Number
 - ❖ Password
 - o User can login via Facebook and Google account.
Note: - User can't add referral code with social media login.
Before check out, users need to complete profile.
 - Set Delivery Location
 - o Current location
 - o Search for area, street name
 - o Saved Address (Location + House Number)
 - Home Page- User can view all restaurant for selected location
 - o Change location button

5. User Story

Actor: User

Story:

1. To order food online from the Web panel and Mobile Application, First of all I need to register myself on the platform-
 - a. To get registered, I can Browse a web panel link or download mobile application direct from Play store and/or from Apple store or get links to download from website also.
 - b. After opening the Web panel or the Application, I will be able to fill the sign up form by entering Full Name, Email ID, Phone Number, OTP and Referral code if I have.
 - c. If I entered right details then I would become a registered user over the platform and from the next time I will only need to login to use the Web panel or the Application by entering the phone number and Password or social log in.
2. First of all I need to select delivery location. I can search restaurant by area and street name. If I have saved address then I can search restaurant for saved address. I can search restaurant for current location.
3. On the Home screen, I will be able to view all restaurants for selected location. I can search restaurant by name and dish. I can view restaurant name, restaurant type, review & rating, delivery time and minimum order value for free delivery. I can apply the relevance/offers/rating/delivery time (Food preparation time + Distance cover time between restaurant to user location + 10 Minutes) filters. I can view icon for announcement. On click announcement icon, I will be able to view announcement image and text. I need to select restaurant from home screen.
4. I will be able to select cuisine form restaurant detail page where I can view restaurant details. User can order food at a time from single restaurant.

Business Requirement Document

5. In the Cart, I can view restaurant name, location and all added cuisine name with quantity. I will be able add any instructions, apply coupon and add number of paper plates and napkins. I will be able to select delivery or pickup for order. I can see restaurant bill with packaging charges, add delivery person tip, VAT TAX + Application owner commission percentage, service fee and delivery charges (if order for delivery). I can process the payment on click of checkout button.
6. On checkout page, I can view total payment and select payment method. I can as well add new card. I can select COD(Cash on delivery) but only for a fixed amount limit.
7. After payment completion, I can view order success screen with order number and track order button. I will receive SMS and Email for order success.
8. I can view only status and delivery person details in web panel. But In mobile application, I can view delivery person tracking on MAP. When order will be picked up then I will receive automatically call and SMS on register phone number. After the order delivered, I will receive pop-up for driver rating.
9. Along with above point, I can View/Add/Edit my account details. I will be able to refer a friend, Share app on social media, View offer and View Past orders. I can add subscription plans and suggest add restaurant to admin. I can view luck offer and apply for the lucky draw. On every draw completion, I will get an SMS about the winning amount & amount will be added to their wallet.

Actor: Restaurant

 - d. If my entered details are verified successfully by the checker then I will receive a confirmation Email.
 - e. Now, I will only need to log in use the Application by entering the Phone Number and Password.
2. On the Home screen, I can view the MAP. Here I can view new order request with the respective details. I can accept the order request or can decline the order request at my preference. I will have 120 seconds to accept or decline request. I can view icon for announcement. On click announcement icon, I will be able to view announcement image and text.

3. If I accept then order's details will be saved in "My Order" section under ongoing order where I can view the order details.
I can call the user and restaurant by clicking on "call button" that will redirect me to my device's dial pad where user's or restaurant's number will be already entered.
4. After accepting the order I will have go to the pick location (Restaurant location). To view route on MAP to the pickup location I need to click on the Navigate button. I will pick the material and initiate the delivery and notification of the same will be sent to the user.
5. To start the delivery, I need to click "Go for Delivery" button and consequently user will be notified that I am on route. After that I will view two more buttons which are Navigation and Delivery complete. To view route on MAP to the delivery location, I need to click on navigate. IF there is no one receives the order the order will automatically cancel in 5 minutes.
6. I can view total earning like- my commission, delivery charges and total delivery tip. I can apply the filter daily/weekly/monthly.
7. I can view lucky offer and apply for the lucky draw. On every draw completion, I will get an SMS about the winning amount & amount will be added to their wallet.
8. Along with above points, I can also view the payment history and under payment section. I can add/edit my profile details, View Help (FAQs), Contact admin and view static content as well.

Actor: Admin

Story:

1. As an Admin to use the backend, First of all I need to log in myself on the platform.

I will browse the link and set the login credentials so from the next time I will only need to log in to use the Application by entering the right set of login credentials.

In case of forgot password, I will click on “Forgot Password button” then a reset password link will be sent to my registered Email ID, clicking on which I will be able to reset my password.

2. On the Home page, there will be a dashboard where I can view new order, total order, delivered order, pickup orders, total earning and can apply the daily/weekly/monthly wise filter.

3. As a Admin I can View/Manage following aspects of the platform from backend-

a. User - I can view/edit user information, activate/deactivate user as well as can view their history.

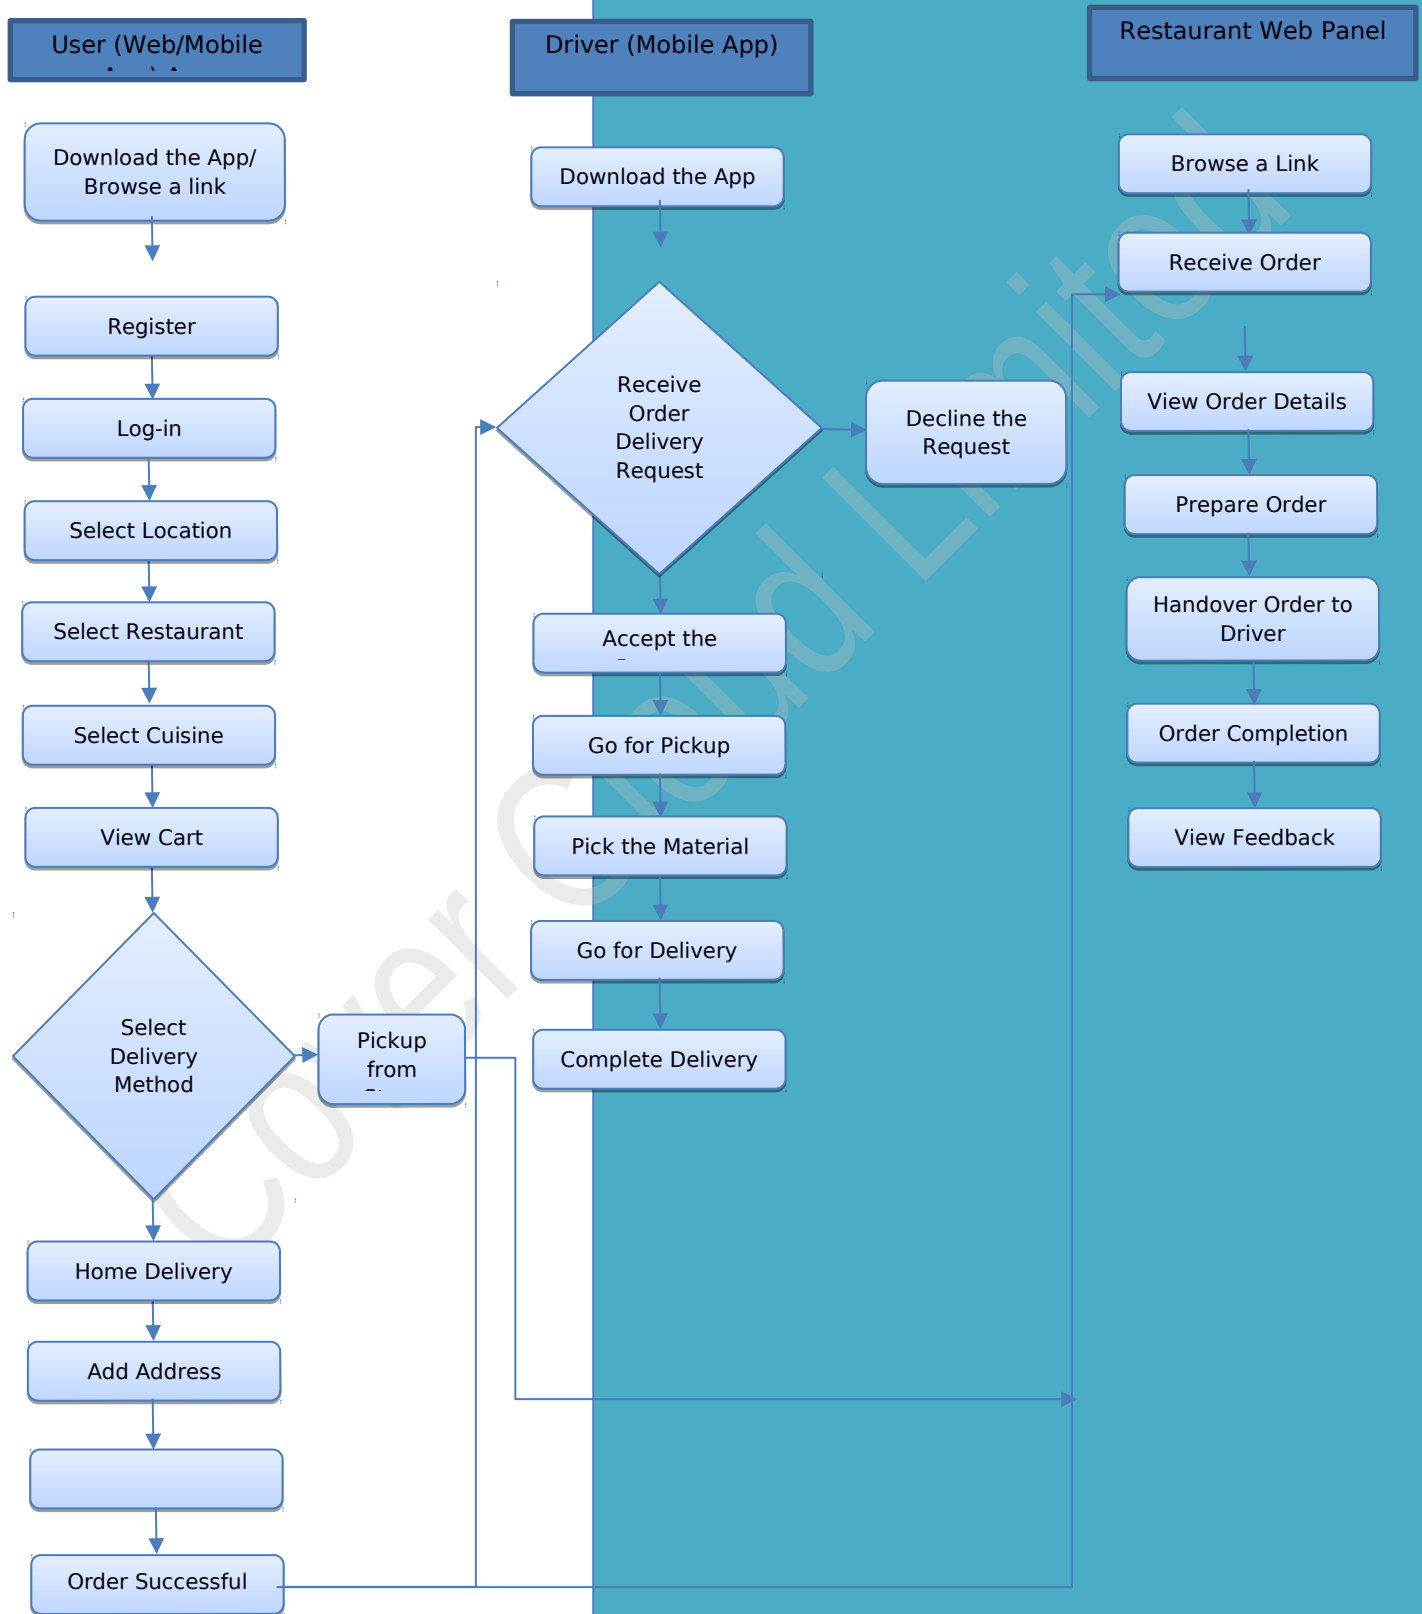

b. Restaurant - I can approve new restaurant verifying his entered details at the time of registration. I will View/Add/Edit order commission for restaurant owner, VAT TAX excluded. 7. Technology

Development Phase	Tools & Technology
Requirement Analysis, Proposal Drafting, BRD writing and Wire framing	MS Office Word 2010 MS Office Vision 2010 MS Office Power Point 2010 Axure RP Pro 7.0
Design	Photoshop/ Dreamweaver
Android	SDK -Android core framework IDE - Android Studio Programing Language - Kotlin Database -SQLite
iOS	SDK -IOS framework IDE - Xcode Programing Language - swift Database -Core data
Web Panel and Admin Panel	SDK - PHP Framework - Laravel IDE - Dreamweaver Database - MySQL
APIs and Web Services	For Server communication
3rd Parties	SMS Gateway Payment Gateway
Quality Assurance and Testing	Test Cases - MS Office Word 2010 Test Plans - MS Office Word 2010 Testing - Manual Bug Tracking and Reporting Tool Redmine

8. Project Deliverables

The following documents will be delivered after the completion and during the process of the entire project and the client satisfaction:

- **BRD Document**

This part of service includes technical analysis of client requirement and giving them a logical form.

- **Complete Source Code**

The Complete source code will be shared with the client, so that in future if the client needs any changes or want to integrate some features and functionalities in the application will be quite easy to implement.

- **PSD files of the design**

We provide all the designs created by us for your project. All the formats including jpeg, Vector, PSD will be shared.

- **Application Build**

After the complete development of the applications we will provide you the build of the applications.

9. Quality Assurance

The project will be developed with considering all the performance and security aspects. The app architecture (User Mobile App and Web Panel + Delivery person Mobile App + Restaurant Panel + Admin Panel) will be designed for best performance so that it can handle significant user volume.

10. Project Execution

10.1 Project Management Process

Execution of the project will be managed by Deepak Daksh as project manager, who will be involved in entire life cycle of the project and a team of technical analysts, UI /UX designers, developers, QA will be working with them on further execution phases.

Moving forward, Deepak Daksh will be your point of contact for any kind of discussion related to project execution. You can also contact sales lead anytime if required.

The below is the process, which will be following in project development life cycle:

- The first phase is the technical analysis and creating BRD for the project – Please note that this phase will require your involvement with the project manager and analysis team to get the BRD freeze.

The project manager will come up with the following at completion of this phase

1. BRD (Approved by you)
2. Project Plan (Approved by you)
3. Test Cases and Test Plan

- Once the BRD is frozen, the next phase will deal with the design phase. Design mockups will be created and sent to you to know your feedback. Based on your feedback the UI/UX team will be able to get the designs approved with 2-3 iterations of design changes.

Business Requirement Document

- On getting your approval and sign-off on UI designs, our developers will start with the development process.
- At the completion of coding, QA team will be involved in the project for quality check and product testing. We use Mantis Bug Tracker Tool for testing.
- The project will be released for UAT (user acceptance testing) to be performed by you once the QA by Cover Cloud team is done.
- After UAT the open issues/ bugs will be resolved and with your approval on project closure, we will deliver the complete bug free product along with all assets, source code, documentations designed/developed for the product development.
- The next phase will be of post-production support and maintenance of the application. We will provide you 45 DAYS FREE BUG REMOVAL SUPPORT.

10.2 Resource Hierarchy

10.3 Project Tracking

To track the Project Development Progress, we will create your account over the Redmine (Tracking Tool) and will send login credentials to you.

11. Pre and Post Requisites from Client

Cover Cloud ensures the highest level of confidentiality in regards to project information. All details shared between Cover Cloud and the client shall only be used for development purposes, and shall be returned to the client.

Following are the information that we shall require from the client:

- Timely feedback
- Credentials of iTunes Store and Play store
- SMS gateway as per our consultation
- Content required at the time of application's Deployment

12. Commitment

Cover Cloud Limited is committed towards serving its customers and ensures that

- We'll deliver all the agreed and finalized Deliverables.
- Complete and Transfer the project in the mentioned timeline.
- Maintain a 100% confidentiality of your data and intellectual property.
- Transfer 100% ownership of the project to the client on project completion and deployment after the complete payment.
- Provide a detailed help documentation if applicable.
- Offer the support as mentioned earlier.

13. Terms & Conditions

The Terms and Conditions of this engagement will be governed by an optional MSA between Chill Sport Restaurants and Cover Cloud Limited instituted prior to the commencement of the project. This MSA, if signed, will serve as a master agreement for future projects and can be updated as deemed necessary.

- . Project Timelines and Material do not include software licenses or other incidental costs and is limited only to the consulting and implementation services as outlined herein.
- . Cover Cloud Limited will raise invoices as per defined milestones. Payment terms are 5 days from the date of the invoices. After 5 days project will be on hold and all the resources will be released. Resuming the same will cost the client minimum \$2200 (or more depends on the team size.)
- . The cost does not include ongoing steady state support post warranty period of 6 weeks after UAT.
- . Unless otherwise agreed herein, Chill Sport Restaurant shall have five (5) business days following the date on which delivery is made by Cover Cloud Limited to complete testing/ review of the deliverable (The "Acceptance Period")
- . If no written notification of material non-conformance is received by Cover Cloud Limited within ten (10) business days from the commencement of the Acceptance Period or if the deliverables are utilized (for purposes other than testing) by Chill Sport Restaurant , the deliverable shall be deemed accepted by Chill Sport Restaurant .
- . There should be a change of scope after the consultancy Study Phase. Cover Cloud Limited shall follow the Change Request Management process (CR process) to revert to the changed effort estimates and the project implementation plan accordingly.
- . Any excess efforts in project development (Post development CR/new features/Out of scope tasks) will lead to **extra cost (\$15/Hour)**, payable by Chill Sport Restaurant.

14. Support & Maintenance

14.1 Post Go-Live Support

- The Post Go-Live Support will be provided free of cost for a period of 45 days after completion of testing. Extra charges will be applicable in case a dedicated team/resource is required by the client during Post Go-Live Support.
- The support period will start immediately after UAT (User Acceptance Testing) period is over. Cover Cloud Limited intends to resolve all the applicable issues reported during this period.
- Support will include any bugs/issues after the deployment.
- Any support related to any Add-on or bug fixing after the post go-live support period is chargeable at the rate of \$15/hour.
- After Post Go live period client can opt for AMC or choose from maintenance packages for extended support. Any support after the product goes live is additional and exclusive to the AMC.

14.2 Paid Maintenance Packages

Maintenance Package Options

- 50 Hrs. for USD 2,400.00
- 100 Hrs. for USD 4,400.00
- 200Hrs. for USD 8,000.00

Maintenance Packages Include

- Bug Fixing (crashes or errors reported by user of the application)
- Design Update
- Feature Extension
- Web and App Upgrading (for every new version launch of OS)
- Periodic Monitoring of Web and App Stats

Terms and Conditions

- The maintenance package needs to be purchased before the completion of the project development.
- Onetime payment, no breaking down into installments. Entire amount has to be paid at the time of purchasing the package.
- The hours mentioned in the packages need to be consumed within specific period from the date of signing the contract. The period will depend on selected package.
- Once the package gets maxed out, following that, the remaining work will be carried out at an hourly price (applicable at that time) or you need to purchase another package.

15. Validity

The standard support is FREE of cost and valid till 45 days from the date of product deployment only in case that the source code is not hampered by any other vendor or the product has not been upgraded during that period.

16. Final Work and Rights

After a successful completion of the final modules and final payment the rights of the Application will be transferred to the buyer. This includes the scripts, application logic and the images and any artwork, which is used on the site. 100% ownership of everything, including the source code, all rights to this technology will belong to Client. Cover Cloud seeks permission to use client name in project portfolio.
