

1. About Us

Cover Cloud Limited is a steadily growing East African based IT development & consulting company with a global network of solution experts and architects. We are an award winning IT Services Company. Our area of expertise includes Web Development, Mobile Development, Web Design, and Salesforce Implementation, Integration and Development services. Over the years, we have been a reliable business partner for our clients, delivering credible solutions exceeding the clients' expectations.

Cover Cloud Limited is a potential business solution provider which provides the best in class services oriented for the increase in profit for businesses and improved value for customers. We at Cover Cloud Limited, deliver exceptional Web/Mobile and Cloud Solutions to our clients across the world, embracing the latest technologies and upbeat industry trends that meet the client requirements.

Our consultants possess competent experience in the most effective collaboration solutions, which allow us to make the unique integration of experience and expertise, to process and system of each client. We follow a streamlined approach to development, which ascertains the quality of development and optimum satisfaction to the client.

Our Services and Expertise

- Web App Design & Development
- Web App and Mobile Strategy consultancy
- Bespoke Web App Development Solutions
- E-commerce Web App Development
- Mobile App development iPhone, Android and Hybrid
- Search Engine Submissions
- Designing Search Engine Friendly Apps
- Software Development
- Multimedia Solutions
- Salesforce Implementation
- Salesforce Consulting
- Salesforce integration with ERP
- Database Management and Data Migration
- Search Engine Optimization
- Paid Submissions to Search Engines
- Submissions to Country-Specific Search Engines
- Improve Website Search Engine Rankings
- Enhance Link Popularity

2. Project Scope

Proposed project comprises the development web based system of medical software to manage a multi-specialist hospital. A hospital management Information system (HMIS) is a computer or web based system that facilitates managing the functioning of the hospital or any medical set up. It integrates all the information regarding patients, doctors, staff, hospital administrative details etc. into one harmonious software system. This complete system is managed by admin from backend.

The Proposed system will be developed with following components:

- Web Panel
 - Front Office/OP Management
 - Doctors
 - Laboratory
 - Radiology
 - Operation Theater
 - Billing & Cash Office
 - Occupancy
 - Nurses
 - Pharmacy
 - Staff
 - Kitchen
 - Admin
 - Procurement & Stores department
 - Morgue

Note: - Biometric API will be provided by client based on their currently used biometric system.

1. Features

1.1 Front Office/ OPD Management Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Patient Registration

a) Select Patient Type

- Direct Patient Registration (for consultation).
- Patient Registration for out patients.
- Patient Registration for inpatients only.

b) Add photograph (Photo capture from webcam).

c) Add Patient details

- First Name.
- Middle Name.
- Last Name.
- Age.
- Phone Number
- Height
- Weight
- Medical history

- Gynecology details
- Relative Phone Number

d) Auto calculation of BMI

e) Disease Details

- Disease Type
- Assign doctor
- Doctor-wise discount

f) Submit and can view patient ID

3. Triage

- a) Customization based on departments.
- b) Able to assign doctor at the triage level.
- c) Track status for patient on triage.
- d) Capability to track doctors list.
- e) Ability to keep ANC patient on triage until lab test are submitted.

1.1 Doctor Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Manage Availability

- a. Available time date wise
- b. Change status (Available and not available)

3. Patient list

- a. Search box
- b. Patient Name
- c. DOB
- d. Patient ID
- e. View details
- f. Disease details
- g. Add analysis report
 - Diagnosis
 - Prescription
 - Select Test (For Lab)

- Radiology
- Internal referral and specialist referrals
- Admit patient to inpatient (Check Box)
- Upload images

4. After Test Patient list

- a. Patient Name
- b. DOB
- c. Patient ID
- d. View details
- e. Disease details
- f. View report
 - Final Diagnosis
 - Add Prescription
- a. Submit

5. View details of inpatient

- a. Search box
- b. Patient Name
- c. DOB
- d. Patient ID
- e. Patient bed number
- a. Add analysis report
 - Diagnosis
 - Prescription
 - Select Test (For Lab)

- Radiology
- Internal referral and specialist referrals
- Discharge patient
- Upload images

6. Logout

1.1 Laboratory Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Patient list

- a) Search box
- b) Patient Name
- c) DOB
- d) Patient ID
- e) Doctor name
- f) Generate unique sample ID
- g) Test Name
- h) Test progress via status
- i) Upload Test Report
 - link sample types to the different tests
- j) Add result description
- k) Submit

3. View details of inpatient

- a) Search box
- b) Patient Name
- c) DOB
- d) Patient ID
- e) Patient bed number
- f) Test Name
- g) Generate unique sample ID
- h) Test progress via status
- i) Upload Test Report
 - link sample types to the different tests.
- j) Add result description
- k) Submit

1.4 Radiology Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

1. Patient list

- a. Search box
- b. Patient Name
- c. DOB
- d. Test progress via status
- e. Patient ID
- f. Test Name
- g. Upload Test Report
 - Capture test results via templates
 - Attach test image and report

1.4 Operation Theater Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Manage the availability of a time slot for particular operating room

a. Add /Edit available time slot

3. View Request of operation

- a. Scheduling the operation
- b. Captures preoperative notes and post-operative notes
- c. Tracks the location of the operation
- d. Check the operation list by surgeon name

4. Inpatient Management

- a. Add patient details
 - Add all details

1.4 Billing & Cash Office Web Panel

1. Login

a) Login by entering following fields:

- User ID
- Password

b) Ability to set user shift hours for tracking purposes

c) Provide end of shift period alert and option to continue

Note: - Admin will create and share user ID and Password.

2. Receive payment

a) Patient ID

b) Payment Type

- Cash
- Insurance
- Add insurance Number
- Corporate credit
- Staff
- Charity

c) Related fee

- Consulting fee, Bed Charges, Test fee, Operation fee, Radiology fee.

d) Payment modes such as Cash, Card, Mpesa, Cheque, PDQ

e) NHIF module for calculating days and post NHIF rebate to a patients bill

f) Capability to post bills after discharge for Inpatients

g) System must allow refund of cash bills

- h) System must allow reprint of bills any point of time
- i) Capability to make mark ups and mark downs for IP and OP billing
- j) Ability to issue credit note for credit bills :insurance and cooperate credits.
- k) Print bills in summary and detail formats
- l) Link insurance plans along with limits

3. Reports

- a) System must provide day book report with details of collection any user and also for total users
- b) System must provide progressive shift reports and shift wise reports for reconciliation and accounting purposes
- c) System must have the facility to issue credit note for any credit bills such as insurance and corporate credits

1.7 Inpatient Management Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Wardroom

- a. Select Room
- b. Add/Edit wardroom Number
- c. Occupied and Unoccupied wardroom
- d. Add Patient ID and Assign bed
- e. Bed Transfer

3. Inpatient Management

- a) Add patient details
 - Add all details
- b) Drugs dispensing from sub location well affecting stock directly.
- c) Track all drugs dispensed or issued to patient .
- d) Chart prescription of the patients as per the dosage and hour to administer drugs and capture activity done notes.
- e) Able to view drug statements with issue and returns for easy reconciliation.
- f) Ability to take various inpatient reports such as active patients, total spent per patient, bed occupancy etc.

4. Discharge patient

- a. View all payment of patient and make him discharge

1.7 Nurses Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

1. Nurses are able to capture nurse care notes and activities of the patient
2. Nurses are able to capture INPUT & OUTPUT and ability to print them
3. Nurses are able to request for lab/radiology/service/pharmacy
4. View patients as per the dosage and hour to administer drugs and capture activity done with notes
5. Add/edit Patient report

1.7 Pharmacy Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Manage Drug

a. Add/Edit drug

- Generic or Brand Name
- Molecule
- Diagnostic code
- Drugs can be classified as Normal, Narcotic, Controlled
- Price

3. View Patient prescription

- a. Patient Name
- b. Patient ID
- c. Doctor name
- d. View prescription
- e. Not available Product
- f. Total Amount
- g. View Payment Type
- h. Submit

4. Accept drug returns from patients if unused

5. Print

- a. Pharmacy labels
- b. Bill

1.7 Staff Management Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. View Attendance

- a. View attendance
- b. Shift time
- c. Available leave
- d. Apply for leave
- e. Apply filter

3. View Shift details

- a. Upcoming shift timing

1.10 Kitchen Panel Web Panel

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Add Menu

(a) For patient

- Select patient type
- Add/edit menu day wise

(a) For everyone

- Add/edit Menu day wise

3. View Menu Requests

- Process menu requests

1.11 Procurement & Stores department

1.Stores department

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. View/Add/Edit/Delete store

a. Search equipment

b. View/add/edit/delete store

- Equipment name
- Unavailable quantity
- Total available quantity

3. Request procurement for equipment

a. Enter equipment name

b. Quantity

c. Send request

2. Procurement

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. View/Add/Edit/Delete store

a. Search Item

b. View/add/edit/delete store

- Item name
- Different department with Quantity
- Unavailable quantity
- Total available quantity

3. View request from stores department

- a. Item name
- b. Brand
- c. Country Of Origin
- d. Quantity
- e. Submit

4. Assign items

- a. Select item name
- b. Select quantity
- c. Add department dispatched to
- d. Submit

1.11 Morgue

1. Login

a. Login by entering following fields:

- User ID
- Password

Note: - Admin will create and share user ID and Password.

2. Dead body entry

- a. ID number
- b. Enter name
- c. Bed number
- d. Enter/Exit
- e. Submit

3. View/edit/delete listing

- a. Search by id or name
- b. Id number
- c. Name
- d. Bed number
- e. Entry date and time
- f. Exit date and time

1.11 Admin Web Panel

1. Login

a. Login by entering following fields:

- Email ID
- Password

Note: - In case of forgot password, a password reset link will be shared to registered Email address.

2. User Management

a) Add/Edit/Delete User

- Add/Edit/Delete Front office/OPD Management
- Add/Edit/Delete Doctors
- Add/Edit/Delete Laboratory
- Add/Edit/Delete Radiology
- Add/Edit/Delete operation theater
- Add/Edit/Delete Billing & Cash Office
- Add/Edit/Delete Occupancy
- Add/Edit/Delete Nurses
- Add/Edit/Delete Pharmacy
- Add/Edit/Delete Staff
- Add/Edit/Delete Kitchen

b) Admin will add users and share user id and password

c) Admin will able to view all Activities

3. Staff Management with Biometric

- Add/Edit staff and connect biometric with profile
- Admin will add shift time for staff
- Leave management
- View In and Out time

4. Patient Management

- a. Search patient ID
- b. View patient details
- c. View patient activities
- d. Payment Type
- e. Receive Payment form patient

5. Human Resource

- a. Capture Interview Process
- b. Capture Recruitment notes
- c. Capture Key details of the employee
- d. Staff can request for leave and online approval of leave

6. Financial Accounting

a. View and Download Report

- System has inbuilt online accounting module to produce real time ledger, GL, P&L, TB reports at any point of time
- View and download online and offline payment

7. Payroll

- Search staff
- View staff total payment
- View Attendance
- This month payment
- Download payment of staff report

8. MIS Reports

- a. Extensive reports based on system features and data captured in the system. The reports can also be uploaded to partner supported systems: ADT, KEMSA ERP, TiBU, eCSM and iHRIS, DHIS2 and MFL/MCUL
- b. Download Reports related to clinical data
- c. Download Reports related to Financial data
- d. Download Reports related to top management report
- e. System has the integrated open source report designer tool for dynamic creation of any customized reports as and when need arises

9. Content Management

- a. Add/Edit hospital logos, colors
- b. Upload files
- c. Add/Edit content
- d. Add/Edit Address, Telephone number, Email address ,Mobile Number

10. Setting

- a. Delivery notes for insurance companies for delivery purposes
- b. Reorder Level, Reorder Quantity, Minimum, and Maximum stock quantity for every location

11. My Profile

a. Add/Edit/Delete Profile Details

Technology

This management information system can be deployed on either centralized or decentralized environments where data is backed up and synced to a central server like Amazon Web Server and adheres to industry standard disaster recovery procedures.

Operating system environment compatibility is for both Windows and Linux.

This system will have capability to run on more than one server.

A well documented API will be provided for integration purposes with any of your existing and future software.
