

Cover Cloud Limited Business Model

Company Overview

Cover Cloud Limited is a Kenyan agribusiness company specializing in the production, aggregation, and supply of premium processing potato varieties. The company focuses on **Markies, Manitou, and Java** potatoes, supplying leading potato processors with consistent, high-quality raw material throughout the year.

Our business combines commercial farming with contract farming, creating a sustainable supply chain that benefits both processors and smallholder farmers.

Vision

To become East Africa's leading supplier of premium processing potatoes through sustainable farming, innovation, and strategic partnerships.

Mission

To produce and aggregate high-quality processing potatoes while empowering farmers through contract farming, agronomic support, and guaranteed market access.

Value Proposition

For Potato Processors

- Reliable year-round supply of processing-grade potatoes.
- Consistent quality meeting processor specifications.
- Traceable produce from professionally managed farms.
- Reduced procurement risks through organised supply chains.

For Contract Farmers

- Guaranteed market for their produce.
- Access to high-value potato varieties.
- Continuous agronomic support from experienced field officers.
- Improved yields and profitability through modern farming practices.
- Long-term business partnership.

Customer Segments

- Potato processing companies.
- Food manufacturers.
- Frozen chips and crisps manufacturers.
- Institutional food suppliers.
- Future export buyers within East Africa.

Products and Services

Primary Products

- Markies potatoes.
- Manitou potatoes.
- Java potatoes.

Services

- Contract farming.
- Agronomic advisory services.
- Crop monitoring and field inspections.
- Quality assurance and grading.
- Produce aggregation.
- Logistics coordination between farms and processors.
- Supply of agricultural inputs (agro-inputs).

Business Operations

1. Commercial Farming

Cover Cloud Limited owns and manages commercial potato farms where Markies, Manitou, and Java potatoes are produced using modern agricultural practices.

The company focuses on:

- High yields.
- Efficient irrigation where applicable.
- Proper fertilisation.
- Integrated pest and disease management.
- Quality control from planting to harvest.

2. Contract Farming Programme

Independent farmers are contracted to grow potatoes under agreed production standards.

Cover Cloud Limited:

- Identifies suitable farmers.
- Signs production agreements.
- Provides technical production guidelines.
- Conducts regular field visits.
- Monitors crop performance.
- Purchases potatoes upon harvest.

This model enables rapid expansion of production without the need to own all cultivated land.

3. Agronomic Support

Our agronomists work closely with contracted farmers by providing:

- Soil fertility recommendations.
- Fertiliser programmes.
- Pest and disease management.
- Irrigation guidance.
- Harvest timing advice.
- Post-harvest handling training.

This ensures every farmer achieves processor-grade quality.

4. Quality Assurance

Every batch of potatoes undergoes inspection to ensure it meets processor requirements for:

- Variety purity.
- Tuber size.
- Dry matter content.
- Maturity.
- Freedom from diseases.
- Minimal mechanical damage.

Revenue Streams

Cover Cloud Limited generates revenue through:

- Sale of potatoes from company-owned farms.
- Margin earned from aggregation of contracted farmers' produce.
- Supply agreements with processors.
- Sales of agricultural inputs (agro-inputs) to farmers.
- Future value-added potato products.
- Agronomy and consultancy services.

Key Partners

- Potato processors.
- Certified seed suppliers.
- Fertiliser suppliers.
- Crop protection companies.
- Agricultural research institutions.
- Financial institutions.
- Logistics providers.
- Irrigation equipment suppliers.
- County governments and development agencies.

Key Activities

- Potato production.
- Farmer recruitment.
- Agronomy services.
- Crop monitoring.
- Procurement.
- Quality control.
- Logistics coordination.
- Market development.

Key Resources

- Commercial farms.
- Contract farmer network.
- Qualified agronomists.
- Transport network.
- Strong processor relationships.
- Production data and traceability systems.

Cost Structure

Major operational costs include:

- Land preparation.
- Seed potatoes.
- Fertilisers.
- Crop protection products.
- Labour.
- Irrigation.
- Agronomist salaries.
- Transport and logistics.
- Packaging.
- Administration.
- Farmer training.

Competitive Advantage

Cover Cloud Limited differentiates itself through:

- Dual production model (own farms plus contract farming).
- Guaranteed market for partner farmers through structured contract farming.
- Strong agronomic support throughout the production cycle.
- Consistent production of processor-grade potatoes.
- Scalable production capacity through a network of contracted growers.
- End-to-end traceability from farm to processor.
- Strong, long-term partnerships with processors and farming communities.
- Diversified revenue streams through potato production, aggregation, agro-input sales, and agronomic services.

Sustainability Strategy

The company is committed to:

- Responsible soil management.
- Efficient water use.
- Safe pesticide stewardship.
- Farmer capacity building.
- Climate-smart agriculture.
- Sustainable land management.
- Improved rural livelihoods through inclusive contract farming.

Growth Strategy

Over the next five years, Cover Cloud Limited aims to:

- Expand commercial potato acreage.

- Increase the number of contracted farmers.
- Build regional potato aggregation centres.
- Strengthen long-term supply agreements with processors.
- Explore export opportunities within East Africa.
- Expand agro-input distribution to contracted farmers and other commercial growers.
- Invest in potato value addition, including washing, grading, packaging, and processing.

Long-Term Vision

Cover Cloud Limited seeks to become the preferred strategic partner for potato processors by building an integrated supply chain that consistently delivers premium processing potatoes while improving farmer incomes, promoting sustainable agriculture, and strengthening food security in Kenya and the wider East African region.
